PROFESSIONAL SUMMARY

A dedicated Software Developer ready to deliver innovative solutions through effort and deliver to customer's success. Work from the established requirements and uses software engineering processes to develop software systems, subsystems, and system enhancements. Completes detailed design and able to individually develop software components and integrate the developed products together and/or individually at the subsystem level. Follows all aspects of the software development lifecycle including scope of work, architecture and design, coding, and automated testing within an Agile and Continuous Integration and Continuous Delivery model. Design, develop, troubleshoot, execute, and debug mission critical software source code using modern software development languages tools, such as JavaScript. Create automated tests leveraging a continuous integration process. Collaborate with teams and implement Agile development tools such as Git to manage work.

TECHNICAL SKILLS

Java/C++ (Object Oriented Programming), JavaScript, JS frameworks React, web technologies including HTML, CSS, XML, REST, JSON, GitHub, Express, Node, Handlebars, jQuery, Bootstrap.

Applications: CI/CD pipeline tools Git Bash, Heroku cloud computing platform, container technologies tools like Kubernetes, MongoDB, Apache, Postman, Visual Studio Code

PROJECTS

Portfolio | <https://github.com/oliverLo78/20-portfolio> |
<https://oliverlo78.github.io/20-portfolio/>

Frontend Developer

- Summary: Using React frameworks created web application to demonstrate some of my favorite projects

- Learned how to create a single-page application (SPA) using React. React is a powerful and elegant technology, creating a portfolio SPA using components, managing application state, and passing data throughout the app.
- Tools/Languages: React, CSS, JavaScript, NodeJs, Bootstrap, GoogleFont

SpeakEasy | <https://github.com/jkanvision/The-SpeakEasy-Project> | <https://jkanvision.github.io/The-SpeakEasy-Project/>

Frontend Developer

- Summary: Solid understanding with responsive design and PDF image manipulation tools. Users discover classic cocktails or get information on favorites.
- Design, build, and deploy a client-side web application using GitHub Pages, Explain and execute Git branching workflow in a collaborative project
- Tools/Languages: HTML, CSS, JavaScript, jQuery, API, Bootstrap, Font Awesome, Bulma

Oop-team-profile-generator | <https://github.com/oliverLo78/oop-team-profile-generator> | Backend Developer

- A Node.js CLI that takes information about a software engineering team and generates an HTML webpage
- Testing is key to making code maintainable, for each part of code and ensuring that it passes all of them. This application won't be deployed, follow the Github repo link and click on the walkthrough video that demonstrates all of the tests passing.
- Tools/Languages: JavaScript, HTML, CSS, inquirer

Work Experience

ANC Roofing

06/2019 – 4/2022

Sales Project Manager

Winter Garden, FL

- Conducted product presentations and communication with homeowners in the insurance claim process from initial to project completion.
- Talking to clients, Monitoring the progress of project staff and updating senior management.

Gaylord Palms Resort

12/2012 – 6/2022

Banquet Server

Kissimmee, FL

- Supervise a team of 10 or more employees, draw buffet diagrams and assign STARS

- Ensure complete setup and servicing of banquet rooms or reception areas for groups of 10-1000+ people

EDUCATION

FullStack Web Developer – Certificate, University of Central Florida, Orlando, FL 12/2022

Bachelor of Arts – Psychology, University of Central Florida, Orlando, FL 12/2006
